The SA is the official tow boat of the Pro Wake Tour and has been for 6 straight years. The Pro Wake Tour is the most dominant, highest level professional wakeboard and wakesurf circuit in the world. The PWT showcases the top athletes

The SA measures out at 22'5" and with an available Indmar Raptor Supercharged 550, this merges true power with maneuverability. The SA provides plenty of power and torque to get any rider up out of the water. But pair that power with Zero Off and Autowake, and you know that the SA will have precise control to keep your wake perfect and speed exact, allowing you to focus on your progression.

from Europe, Australia, Canada, and the US, the Supra SA is the chosen boat to pull these top athletes.

The SA comes standard with Supra's Swell Surf and Smartplate Systems. The Swell System delivers tall waves with long pockets and optimal push all the way through-perfect for riders who like to transfer from side to side. The Supra SmartPlate optimizes hull position for better wake and wave control and can be used to smooth out the ride in rough water.

The SA doesn't just deliver power and performance, it brings the luxury and comfort that Supra is known for. From Chill Tech Vinyl to the heated and powered drivers seat, every detail has been thought of to insure you receive the level of riding you expect whether you are behind or in the boat
