With as many as 7 precisely placed ballast locations that combine for the 5650-pounds of ballast, the industry's largest factory ballast capacity in a 24-foot boat. Create pro level wakes or waves that can be adjusted independently midsession in as little as 90 seconds with available RAMFILL ballast. With 20 degrees of dead-rise at the transom the Opti-V Hull displaces more water with less weight while preserving a great rough-water ride.
